Rounding off bathroom design concepts

Make a statement at the washbasin with the KEUCO light mirror

With its harmonious design and clever functions, the round light mirror from KEUCO becomes the focal point of the modern bathroom. Available in two sizes – 800 mm and 1000 mm diameter – the mirror provides a large, excellent reflection. In addition to its attractive appearance, the light mirror features sophisticated technology and is highly user-friendly.

The light mirror has a double mirror edge, creating a very impressive lighting effect. The smooth, evenly distributed luminescence at the edges provides elegant, indirect lighting. The double rim gives the mirror a modern, depth-enhancing effect, setting stylish accents in the bathroom.

The circumferential light ring provides even, glare-free illumination of the face and ambient lighting for the entire room. The light mirror is controlled by a capacitive touch sensor positioned directly on the mirror, permitting intuitive operation.

The light colour can be continuously adjusted to suit any time of day: The light can be flexibly regulated from warm white 2700 Kelvin to daylight white 6500 Kelvin using a sensor switch. Whether for morning make-up, shaving, or a cosy evening ambience - the KEUCO light mirror adapts perfectly to any situation.

The integrated mirror heating, which is automatically activated in conjunction with the lights, provides additional comfort. Even after a hot shower, the mirror remains clear and fog-free. The heating function is designed to run for 45 minutes and then switch off automatically.

Thanks to its IP44 certification, the light mirror is ideal for use in humid environments, meeting the safety and technological demands of modern bathroom design.

PRESS INFORMATION

Its design idiom blends seamlessly into a wide range of interior styles - from puristic-modern to homely-elegant. The KEUCO Light mirror is a design element that creates ambiance and elevates the entire room.
