

KEUCO

FITTINGS & ACCESSORIES

# Brushed stainless steel

**Prove your strength.** Stainless steel finish impresses with its clear, fine look and high adaptability. The surface radiates cool freshness and impresses with its durability. The impression is neutral, forms a harmonious symbiosis with its surroundings and is yet striking in perception.

## Not only superficially impressive

KEUCO mixer taps and accessories are characterised by a fine structure, which is achieved by carefully brushing the surfaces and giving them an elegant texture. This is done by hand with precision. The fittings and accessories' stainless steel look is created by a special nickel layer that is applied to the products after brushing in KEUCO's manual electro-plating facilities. This intensive surface finish gives the mixer taps and accessories their refined, understated expressive strength.

Finally, the surface is passivated, which protects the mixer taps and accessories so that they retain their attractive look for years to come and withstand moisture and daily wear and tear.

2-Way thermostatic shower set for concealed installation with outlet for shower hose and shower bracket, shower hose, hand shower, shower arm, for shower head

## Design upgrade

The straight-lined shapes of the KEUCO mixer taps and accessories in brushed stainless steel emphasise the powerful aesthetics of this elegant surface. With its cool style and refined look, the stainless steel finish embodies a perfect balance between strength and elegance.

The stainless steel finish gives products with an organic rounded design a sensual upgrade. Here, the natural softness of the shapes is enhanced in a fascinating way by the softly brushed texture.

The surface gives the products an unparalleled look that blends seamlessly in both modern and classically.

## Unlimited possibilities

The mixer taps and accessories in stainless steel finish can be harmoniously used in a wide range of worlds. They stand out discreetly and stylishly among neutral tones. Its striking presence is particularly evident in calm, cool colour schemes, while warm tones can create exciting contrasts and add a dynamic touch.

Many other products in the diverse KEUCO range are available with the modern, elegant surface.

## Discover more surfaces

For a number of decades, KEUCO's success has been based on the high quality of its products. The meticulous processing of the surfaces and their durability in particular are a very decisive quality standard.

Extravagant **PVD surfaces** in warm bronze, champagne-coloured nickel and fine black chrome lend mixer taps and accessories a luxurious touch. The manufacturing process guarantees an extremely resistant surface with a very high degree of hardness.

**Velvet matt aluminium surfaces** are characterised by their particular resistance to fingerprints and water droplets, for example, and are therefore very easy to clean.

Matt **black** surfaces impress with their special colour intensity. A special powder coating makes them resistant, durable and easy to maintain.

Classic KEUCO **chrome surfaces are created** in a special three-stage process. An additional semi-gloss nickel stage ensures a special deep gloss and long-lasting corrosion protection.
