

KEUCO

FITTINGS & ACCESSORIES

Brushed brass

It's gold that shines. True treasures in bathroom design are revealed in the exclusive KEUCO mixer taps and accessories with a brushed brass surface. Each of these products are finished with the utmost care and the finest craftsmanship with a layer of 23.5 karat gold.

Step by step to perfection

Carefully brushing the surfaces creates an unmistakable, fine structure that gives the mixer taps and accessories their unique, elegant character. This delicate texture stands out from shiny surfaces and creates an atmosphere of stylish understatement.

After the surface is finished with a layer of 23.5 karat gold, the final passivation takes place in the manufacturing process, which contributes decisively to the robustness and durability of the surface. This process protects the mixer taps and accessories from external influences and preserves the luxurious appearance for many years.

KEUCO mixer taps and accessories not only add exclusive accents, but also remain an expression of timeless elegance and sophisticated craftsmanship in the long term.

High-quality appearance

The warm, matt look of brushed brass creates a sophisticated yet harmonious atmosphere in any room. The surface is luxurious and glamorous, but at the same time subtle and reserved. It gives the mixer taps and accessories an exciting feel that radiates sophistication and elegance.

The EDITION 11 series is characterised by straight-lined contours. The clean design underlines the value of the fittings and accessories and their solid materiality. Brushed brass gives the series a new expression and effect in bathroom design.

- ← EDITION 11
Single-lever mixer set concealed for 2 wall outlets for shower hose and hand shower bracket, shower hose, hand shower with round pencil, hand shower arm, shower head
- EDITION 11

For a number of decades, KEUCO's success has been based on the high quality of its products. The meticulous processing of the surfaces and their durability in particular are a very decisive quality standard.

Extravagant **PVD surfaces** in warm bronze, champagne-coloured nickel and fine black chrome lend mixer taps and accessories a luxurious touch. The manufacturing process guarantees an extremely resistant surface with a very high degree of hardness.

Velvet matt aluminium surfaces are characterised by their particular resistance to fingerprints and water droplets, for example, and are therefore very easy to clean.

Matt **black** surfaces impress with their special colour intensity. A special powder coating makes them resistant, durable and easy to maintain.

Classic KEUCO **chrome surfaces are created** in a special three-stage process. An additional semi-gloss nickel stage ensures a special deep gloss and long-lasting corrosion protection.
