FITTINGS & ACCESSORIES

# Brushed red gold

## **Create atmosphere with soft accents.**

Mixer taps and accessories in brushed red gold exude unique charm. The warm colour scheme enhances the aesthetics. The brushed surface gives the red gold a subtle shine that looks sophisticated without being intrusive.

← EDITION 400  
Single-lever basin mixer wall mounted

## The finest craftsmanship

Precise brushing of the surfaces creates a fine structure that gives the mixer taps and accessories their unmistakable, elegant character. For their unique appearance, they are finally refined in meticulous handwork in an elaborate electroplating process.

Before the KEUCO mixer taps and accessories are coated with 19-20 karat red gold, they are given an additional layer that underlines the durability and quality of the surface: a galvanic white bronze finish. The name refers to the characteristic colour after this special processing, which creates a brilliant basis for the fine red gold on the mixer taps and accessories.

In the final step of the manufacturing process, the surface is further refined by a careful passivation process. Passivation protects and stabilises the red gold, keeping its luxurious radiance for years to come and making it stand up to moisture and daily wear and tear.

## Stylish insert

The warmth of red gold accentuates its soft surroundings or complements cool colours, creating a balanced and tasteful contrast. The sensual design of the EDITION 400 mixer taps and accessories combines soft, organic shapes with straight lines. A soft oval characterises their face. The light colour of the red gold brushed surface gives the products a sensual personality and warm elegance.

## Discover more surfaces

For a number of decades, KEUCO's success has been based on the high quality of its products. The meticulous processing of the surfaces and their durability in particular are a very decisive quality standard.

Extravagant **PVD surfaces** in warm bronze, champagne-coloured nickel and fine black chrome lend mixer taps and accessories a luxurious touch. The manufacturing process guarantees an extremely resistant surface with a very high degree of hardness.

**Velvet matt aluminium surfaces** are characterised by their particular resistance to fingerprints and water droplets, for example, and are therefore very easy to clean.

Matt **black** surfaces impress with their special colour intensity. A special powder coating makes them resistant, durable and easy to maintain.

Classic KEUCO **chrome surfaces are created** in a special three-stage process. An additional semi-gloss nickel stage ensures a special deep gloss and long-lasting corrosion protection.
