PLAN from KEUCO: Bathroom furnishings in colourful harmony

Washbasin furniture and light mirrors, tone in tone

KEUCO's PLAN furniture and washbasin series was conceived for design-lovers with a passion for unique functional features. Not only do the washbasin furniture and light mirrors offer impressive, innovative solutions, but they are also perfectly colour coordinated.

Developed by the Tesseroux + Partner design agency in Potsdam, the design of KEUCO's comprehensive PLAN furniture and washbasin series is characterised by modern straight lines and straightforward elegance with a tone-in-tone look. For example, fronts and bodies of the furniture are always monochrome, radiating calm and harmony. The colours modelled on nature are exactly in line with current trends. Even friends of classic colours such as white and anthracite will find what they are looking for here for demanding architectural challenges. The glass surfaces add a luxurious touch to every bathroom. The PLAN furniture and washbasin sizes ranging from 500 mm to 1200 mm make bathrooms of every size shine, creating a unique atmosphere.

PLAN's handleless bathroom furniture takes centre stage through its simple elegance. And for that extra measure of attention, the bathroom furniture is also available with legs – for a contemporary look for vanity units, sideboards and tall units. The colour of the design-oriented, slim leg is coordinated with the furniture, and the filigree metal legs also have a premium powder coating.

The PLAN tall unit has a smart and visually appealing shelf integrated into the side. Indiscernible from the front, the unit offers an abundant amount of space for day-to day bathroom products.

PRESS INFORMATION

Sensible functionality down to the smallest detail – this is how the PLAN vanity unit will surprise you with its additional inner drawer. The interior arrangement gives a finishing touch to the overall concept.

PLAN ceramic washbasins will impress you with their very flat yet filigree design and soft shape. The transition from generous storage space, down to the bowl of the washbasin is seamless, and the ceramic drain cover harmonises perfectly. Thanks to the extremely easy-to-care-for nature of the material, fine ceramic stoneware satisfies the highest standards of durability and hygiene. Moreover, it is possible to combine a washbasin made of the premium material Varicor in the standard width of 800 mm with PLAN bathroom furniture. As design highlight, a free-standing fitting designed specially for the linear washbasin stands raised in the middle of the washbasin.

Perfectly colour-coordinated (light) mirrors with sophisticated technology

The PLAN mirror and light mirror fit perfectly with the washbasin furniture of the series, forming an aesthetically pleasing unit. Their surrounding frames exactly match the respective colour of the furniture. At the same time, the frames give the (light) mirrors a picture-like effect. The coloured finish of the premium aluminium frame is durable and easy to care for, and the LED bulb ensures that the face is illuminated perfectly. The light mirror is available with up to two light colours and also with practical mirror heater. Using the control element, the light colour can be varied and the mirror heater turned on. The washbasin lighting and main lighting can be switched on or off and dimmed separately. The intelligent electronics remember the most recent lighting settings the next time it is switched on again.

With a matching design, KEUCO's PLAN S fittings and PLAN accessories add accents to bathroom design with PLAN washbasin furniture and light mirrors.
