SHOWERING IN COMFORT AND SAFETY
If you want more safety and comfort in your bathroom, you don't need to compromise on first-class design: We can offer you a bathroom range which impresses both ergonomically and aesthetically in equal measure.
The trend in bathrooms is towards generously sized showers, with shower trays that are flush with the floor. Besides an enjoyable shower experience, comfort and safety are of prime importance. With the fittings and accessories of the PLAN and ELEGANCE series, KEUCO offers functional and aesthetic solutions that make your everyday shower a special moment of well-being – increasing your quality of life in the long term.

Seating in the shower offers an additional level of comfort, also enabling extra safety when showering. The PLAN tip-up seat offers a strikingly beautiful and elegant solution; its top-quality materials and craftsmanship impress at first glance; the comfortable seat and the high load carrying capacity make it a safe and attractive feature in the shower. The soft and slightly recessed foam seat and the strong wall bracket mean that it can be used in comfort and safety, with the added reassurance of the high quality of the product.

Available in dark grey, light grey or white, the PLAN tip-up seat integrates harmoniously into the bathroom or shower area. The wall bracket comes in either a chrome-plated or aluminium finish. KEUCO offers two sizes, depending on your individual requirements or the amount of space available. With a load bearing capacity of 150 kg, the PLAN tip-up seat can be used both in private as well as public buildings. The larger model also satisfies the DIN 18040-1 requirement for barrier-free construction in public buildings.

Thanks to the suppleness of the material used, the soft foam seat offers a high level of comfort as well as security.
A corner solution for the shower that leaves nothing wanting. The rail system serves as a shower rail, a stable grab rail as well as a holder for a mountable tip-up shower seat. The matching sponge basket for corner installation rounds everything off.

The tip-up seat from the PLAN range can be folded away after use in order to save space. If it is only used on rare occasions, it can be removed by hand and stored away until it is needed again.
With approximately 500 individual articles, the PLAN bathroom concept is the most comprehensive bathroom series on the market. The fittings and accessories combine functionality and aesthetics thanks to their diverse options and sophisticated design. Numerous shower seat options in different colours round the extensive range off. Choose between tip-up seats with or without a back rest. What they all have in common is an ergonomically shaped seat.
Ergonomics and safety in the bathroom are factors that are attracting increasing attention. These days, a bathroom should ideally be planned in such a way that it can be adjusted to suit the growing need for personal comfort in the years to come – and with KEUCO no one needs to compromise on aesthetics in order to achieve that.

The ELEGANCE collection is a particularly beautiful example. Overhead and hand showers can be individually combined and the rail system fits in perfectly with the shower environment.

Ergonomics that feel good with design that looks good: The integrated approach of the ELEGANCE collection is perceptible in every detail.
